

Let there be light!

Do your students know . . .

that most of the world's people live without electricity?

Can they imagine . . .

what effect that has on young people's learning and daily lives?

Can they figure out . . .

the consequences to sickness and mortality among children and families?

Can they grasp . . .

how a simple classroom electricity project can bring light to the developing world?

A hands-on Green Energies Workshop helps your class discover and learn

- Using simple materials, students construct a "light in a bottle"
- They learn up close the concepts and the craft of electricity and solar power
- They connect with real students and adults who are doing the same project in the small villages in Tanzania
- They engage on a personal level with the economic and environmental challenges of the developing world

Green Energies Workshops

Green Energies invites you to our electrifying learning experience for students from elementary through high school ages . . .

Choose the approach that suits you best – or combine all three

Do It Yourself Classroom Kits

We supply ready-to-go craft kits that take your **Let There Be Light!** project from start to finish.

- Each kit contains all materials necessary for a student to complete the project
- Clearly illustrated instructional manual suits all levels
- Hands-on methods adapt easily to differentiated learning needs (grades 4–12)
- Lessons can be organized to adapt to the time available (from 3 hours to 2 weeks)
- To bring alive the real-world connection, you'll receive a complimentary copy of the book *In Our Village: Kambi ya Simba Through the Eyes of Its Youth* and accompanying videos
- To order do-it-yourself classroom kits, contact info@greenenergiesllc.com or call 401.245.0241

Classroom Workshop-Presentation

Coming in fall '08

Green Energies founder Tony Cervone comes to your classroom for a hands-on **Let There Be Light!** workshop-presentation.

- Includes craft kits with all materials necessary for each participant to complete the project
- Length of workshop is tailored to your needs
- To bring alive the real-world connection, you'll receive a complimentary copy of the book *In Our Village: Kambi ya Simba Through the Eyes of Its Youth* and accompanying videos
- For more information, contact info@greenenergiesllc.com or call 401.245.0241

Professional Development Workshop

Coming in fall '08

Green Energies founder Tony Cervone trains teachers in how to carry out the project.

- Hands-on workshop-presentation is tailored to your teaching needs and schedule
- Learning outcomes and sample assessment rubrics for project are provided, aligned with national standards in science and social studies
- Workshop-presentation includes a craft kit for each workshop participant, with all materials and instructional manuals
- You receive a complimentary copy of the book *In Our Village: Kambi ya Simba Through the Eyes of Its Youth* and accompanying videos
- For more information, contact info@greenenergiesllc.com or call 401.245.0241

Bonus: Service learning opportunities for teachers and/or students!

- Pay a Web visit to the students who helped create the book *In Our Village: Kambi ya Simba Through the Eyes of Its Youth* and accompanying videos
- Create your own "In Our Village" booklet as a classroom project combining literacy, science, and social studies. Then share your project with other students around the world, through the In Our Global Village website http://inourvillage.whatkidscando.org/global_village_project.html
- Raise funds for a teacher or student exchange visit to Kambi ya Simba, the actual village in Tanzania where Green Energies developed **Let There Be Light!**
- Work directly with English-speaking students and teachers as they electrify their village, opening doors of economic and educational opportunity.
